9-11 am QUOSA™ Basics
11:30 am-1:30 pm QUOSA Advanced Workshop
2-3:30 pm Reference Manager
Location Hatfield CRC - Conference Room 4-3330

NIH Library Resource Training

Course Descriptions

EndNote Basics

Learn how to use EndNote software to perform searches, capture references and convert them to records in a personal, searchable database. Also learn to select references and format them for your papers using specific journal styles and instantly create your bibliography.

Evidence Based Resources 101

For the busy researcher or clinician, this class presents quick and easy ways to find electronic evidence based medicine resources.

PubMed

PubMed is the National Library of Medicine's (NLM) web interface to the Medline database. Use PubMed to find references to journal articles in the medical and health sciences. In this class you learn the basic features of searching PubMed including ordering articles online.

Reference Manager

Reference Manager software allows you to electronically manage your reference files. Learn how to link to references in your Reference Manager library when writing papers and automatically format papers to meet the requirements of various publications.

Scopus

Scopus is an interdisciplinary, bibliographic database that indexes the contents of more than 15,000 journals in the physical sciences, engineering, earth and environmental sciences, life and health sciences, social sciences, psychology, business, and management. Scopus content includes Medline and Embase citations. Learn how to search Scopus to identify articles of interest; perform cited reference searches, store searches and create subject, author or cited reference email alerts.

QUOSA Basic

QUOSA Information Manager makes it possible to search your favorite databases, e.g., PubMed, Web of Science and Ovid databases and quickly retrieve all the full-text articles at one time. Quosa also allows you to query, organize, save, share, and analyze information from your desktop. QUOSA has effortless integration with EndNote and Reference Manager.

QUOSA Advanced Workshop

Explore the advanced QUOSA functions including: Concepts4Clustering™, Algorithm settings and the Virtual Library.

Directions to CC Medical Board Room & Hatfield CRC Conference Room (Bldg. 10)

Directions to CC Medical Board Room 2C116

• From North Entrance (CRC)

Walk to the left of the CRC Information Desk and continue straight down corridor to glass doors and entrance to Building 10, Clinical Center. Turn left and follow signs to hallway leading to Lipsett Amphitheater. Take stairway at end of hallway (to the left of Lipsett entrance) to second floor. On second floor, turn right to the Medical Board Room.

• From South Entrance (CC)

Take left or right hallway and continue through the length of Bldg. 10. Pass main elevators and old Café area. Turn right at the former information office and follow signs to Lipsett Amphitheater. Take stairway at end of hallway (to the left of Lipsett entrance) to second floor. On second floor, turn right to the Medical Board Room.

Directions to Conference Room 4-3330

• From North Entrance (CRC)

Walk to the left of the CRC Information Desk and pass the Café. Follow signs to the "East Laboratories". Turn left at the "East Laboratories" corridor. Proceed to elevators at end of hallway. Take elevator to the 4th floor. Enter door to the left of the glassed-in lounge area. Room 4-3330 is located immediately beyond the door.

• From South Entrance (CC)

Take left or right hallway and continue through the length of Bldg. 10. Pass main elevators and old Café area. At end of hallway, turn left following signs to "Admissions". Turn right into the entrance to the Hatfield Clinical Research Center. Follow the overhead signs to the "East Laboratories" corridor. Immediately after the Pharmacy entrance, turn right into the "East Laboratories" corridor. Proceed to elevators at end of hallway. Take elevator to the 4th floor. Enter door to the left of the glassed-in lounge area. Room 4-3330 is located immediately beyond the door.
